

TOURMALINE ENERGY WATER FLASK

RICHWAY ALKA ENERGY-A1

Tourmaline pellets for Negative Ions, Maifanitum, Calcium Ion pellets, Zeolites and Magnesium.

Richway Alka Energy - A1

Portable Water Alkaline pH Enhancer. Increases the pH level and filters your drinking water.

Alka Energy -A1, while technically not a water ionizer, filters your water and uses natural elements to increase the pH levels of your water.

Zeolites can absorb and retain heavy metals and toxins.

Tourmaline helps to clean, mineralize, and ionize the water.

Here are some water tests you can do with RICHWAY'S ALKALINE WATER

1. Dissolved oils (emulsification) test

This proves that the smaller molecules of alkaline water are able to dissolve grease and fat, and aids in the excretion of toxins.

Method of experimentation : Get two clean water and fill them with equal amounts of edible oil. Now, add an

equal quantity (about half of the oil volume) of RichWay alkaline water. Mix the oil and water, and you will notice that they emulsify into a single substance.

CONCLUSION ▶ This proves that the smaller molecules of alkaline water have excellent powers of dissolution, emulsification, and penetration. It's able to clear out toxins from your blood vessels, increase vascular permeability, and improve the quality of blood.

2. Alkaline Water vs Purified water Test : Acid base balance test

Method of experimentation : Get two clean water bottles and fill one with purified water, and the other with RichWay alkaline water (both in equal amounts). Now, add 5 drops of pH testing solution to each bottle, and you will notice that the purified water turns yellow.

CONCLUSION ▶ By turning yellow, this proves that purified water contains acidic properties, while the RichWay alkaline water turns blue due to its properties of alkalescence.

3. Alkaline Water vs Glucose

Method of experimentation : Fill a glass bottle, w/ 5-10ml of glucose water drawn via syringe, eye dropper or something similar. Add 3-5 drops of pH testing solution, and you will see the glucose water turn yellow (acidic). Now add an equal amount of alkaline water to the bottle, and you will see the solution turn blue.

CONCLUSION ▶ This implies that glucose could potentially acidize the human body, while alkaline water is able to neutralize the additional sugar contained within.

ALKALINE IONIZED WATER

TOURMALINE ENERGY WATER FLASK

Drink 8 oz water before use the Biomat.

1. Alkaline Water vs Smoke Test

Method of experimentation : Fill a container with an ounce of water and 1-2 drops of pH testing solution. The water becomes blue-colored. Now, take a puff of a cigarette and blow the smoke into the bottle. Immediately close the container and shake it, and you will find that the water turns light yellow. Now, if you add an equal amount of alkaline water, the light yellow turns to blue.

CONCLUSION ▶ Smoking can acidize the human body. Drinking alkaline water can help to neutralize the smoke or mist produced by smoking, reducing the harm caused by cigarettes and tobacco.

2. Alkaline Water vs Alcohol/Liquor/Wine

Method of experimentation : Get two transparent glass bottles, fill one with a small amount of alkaline water, and the other with a small amount of liquor. Put a few drops of pH testing solution into both bottles and compare them. You can see that the alkaline water turns blue, while the highly acidic, liquor turns yellow. We can conclude that the liquor or wine is highly acidic, and people which consume these are highly susceptible to having an acidic body constitution. When we begin to pour the RichWay Alkaline Water into the alcohol, it gradually begins to turn blue. It's clear that drinking RichWay Alkaline Water before or after consuming alcohol not only helps to stave off inebriation, but can also neutralize the acid within the human body and help to lower an acidic body constitution.

CONCLUSION ▶ In today's society, due to the frequent exchanges of business and interpersonal relationships, many people tend to drink to excess. As a result, many are afflicted with fatty liver or gastrointestinal disorders at a younger age. In the long run, it can worsen to cirrhosis of liver or cancer. Therefore, to drink a few cups of RichWay Alkaline Water before or after drinking is meant to lessen the burden on

the liver, enhance immunity, prevent disease, and protect the liver as well.

3. Alkaline Water vs Carbonated Drinks

Method of experimentation: Take a transparent glass cup and pour about an ounce of alkaline water and a few drops of pH testing solution into it. Now, pour a small amount of carbonated drink into it and the water turns yellow due to its acidic properties. When you add in an additional amount of alkaline water the solution turns blue again.

CONCLUSION ▶ This proves that alkaline water is able to neutralize the acidic constitution caused by the frequent consumption of carbonated drinks.

4. Alkaline Water Antioxidant Test

Method of experimentation : Get two glass bottles. Fill one with alkaline water and one with tap water. Now put 5 drops of a strong oxidizing solution (iodine tincture) into each bottle. The tap water turns yellow and is obviously oxidized, while the alkaline water remains the same, proving that alkaline water has strong antioxidant effects.

5. Alkaline Water Emulsification of Edible Oil Test

Method of experimentation : Pour the same amount of edible oil into two glass bottles. Now fill one bottle with 30% alkaline water, and fill the other bottle with 30% purified water. As we know, oil is not soluble in water, and we can see that the water and oil have separated in the purified water bottle, but part of the oil has emulsified in the bottle filled with alkaline water.

CONCLUSION ▶ If we often drink water of weak alkalinity and absorb the alkaline water into the blood that flows through the blood vessels, the fat will be emulsified by the alkaline water slowly and be expelled later with bowel movements, making the blood vessels much softer and ventilated. The nutritive substances can then flow into the human body with the alkaline water.

6. Alkaline Water Vs Free Radicals (negative potentials)

Method of experimentation: Pour the same amount of purified water and RichWay Alkaline Water into two glass bottles. Now, fill each bottle with five to six drops of iodine (equal to the free

radicals within the human body) and we can see the purified water in the left cup becomes brown (iodine's natural color) and the RichWay Alkaline Water in the right cup remains unchanged in color.

CONCLUSION ▶ The negative potential produced by the RichWay Alkaline Water Bottle (via micro-electrolysis) is able to clear out the excessive free radicals within the human body, enhance its oxidation resistance, and delay the aging process.

HOW DOES IT WORK?

- ▶ Alkaline Balance
- ▶ Small Molecules
- ▶ Far Infrared Rays
- ▶ Negative Ions
- ▶ Low ORP
- ▶ Active Hydrogen

Pour regular water into the Portable Alkaline Ionizer (Alka Energy-A1 Flask), and let stand for 5-10 minutes. Using 13 unique minerals including Far Infrared energy stone, Maifanshi stone, Muyu jade, special clay, Tourmaline, Nano Silver, Kaolin Earth, and rare earth for energy.

- CAP**
Food grade # 304 Medical Device Quality stainless steel
- FILTER**
This filter should be changed. filtering capacity is 1,000 gallons. Using 8-12 months
- BOTTLE**
Medical Device Quality stainless steel
